Jan 29, 2016 Intel® Core™ 2 Duo Processor E7200 - @ 3.8 GHz; 2M Cache -; 1000 MHz FSB -; C2D E7200 is a quad-core processor made by Intel and includes two x86 cores and two

ARM cores that enables 2x faster computation and multi-threading. Memory

1. Write a comment. More Reviews. Intel Core 2 Duo E7200 is a dual-core processor with 2MB L2 cache and clock speed up to 3.8GHz and this machine offers up to 1GB of memory. For more information and prices check out our Core 2 Duo E7200 product page. On November 12, 2010 Intel announced the dual-core Core i5 (presumably based on the new Sandy Bridge CPU core). The Core i5 is basically a two-core Nehalem and raises the bar for the 3rd generation Core processors. Some of the new features are: Up to 10MB (virtual) of L3 cache, faster DDR3 memory (850/1333 MT/s, non buffered on-chip), an integrated graphic core (?like the Quartz GPUs?), and a new company-wide logo. I am not sure

about the price. Intel® Core™ i7-3930K Processor - @ 3.9 GHz - 2 Core, 6 Thread - Intel Core i7-3930K Processor is the latest dual-core consumer and professional processor from Intel for desktop PCs. This processor is made for overclocking enthusiasts and videographers who demand the best gaming performance, everyday accessibility and quality-oriented design, while featuring Intel technology that enables easy overclocking capabilities for systems that offer multiple overclocking. Com/software - Intel® Core™2 Duo E6300 Processor - 2C/4T - E6300 f678ea9f9e
